Methodologies

- SCRUM / Agile
- Test Documentation

Tools & DevOps

- Jira
- Confluence
- Git / GitLab
- Jenkins (CI/CD)
- Figma / Trello

Databases

- SQL (SQL Server)
- Oracle
- MySQL

Languages

- English B1

Professional Experience

Mid-Level Test Analyst, Codgo.X — 2024 - Present

- Development and maintenance of automated E2E tests with Cypress.js for Bradesco's consortium system, ensuring stability and quality of critical features.
- Use of Git/GitLab/GitHub for code versioning, branch creation, and commits within the QA team's CI/CD workflow.
- Creation and review of test scenarios and test cases, contributing to coverage and QA process documentation.
- Bug identification and reporting in the staging environment, supporting the development team in agile defect resolution.

Junior Test Analyst, upLexis Tecnologia — 2022 - 2024

- Responsible for the Marketplace, upFolder, and Novo Dossiê projects, working with manual, API, and usability testing.
- E2E and API test automation with Cypress.js + Postman, integrated with GitLab for versioning and code control.
- Performance testing with JMeter, validating platform stability under different load conditions.
- Elaboration and maintenance of test scenarios and cases, with documentation and bug tracking via Jira and Trello.
- Work in support/maintenance, analyzing and validating corrections to bugs reported by clients, ensuring development adjustments before going to production.
- Active participation in SCRUM ceremonies, collaborating directly with the development team throughout the delivery cycle.

Junior Test Analyst, Lecom Tecnologia — 2020 - 2022

- Manual testing on Lecom BPM (Web and Mobile), documenting bugs, defects, improvements, and tasks in Jira.
- Creation of specific test cases for the Lecom tool, covering the system's main flows.
- Creation and execution of SQL Server, Oracle, and MySQL database scripts for validation and testing support.
- Environment updates and management via Jenkins, ensuring stability for testing cycles.
- Active participation in SCRUM ceremonies within the squad, collaborating in the product delivery cycle.
- Support in onboarding new QA team members, sharing processes and best practices.

Education

Bachelor of Computer Science — Completed 2021

Faculdades Integradas de Bauru (FIB) - Bauru/SP

IT Technician — Completed 2017

ETEC Monsenhor Antonio Magliano - Garça/SP
